

A scatter plot showing the relationship between Relative PYL1 Abundance (x-axis) and Relative PYL1 Abundance (y-axis). The x-axis is labeled 'Relative PYL1 Abundance' and ranges from 0 to 100. The y-axis is labeled 'Relative PYL1 Abundance' and ranges from 0 to 100. A dense cloud of grey points represents the data. A solid black curve is fitted to the data, showing a non-linear, increasing relationship. The curve starts at approximately (5, 5) and rises steeply towards (100, 100).

Relative PYL1/ABI1 Binding

Relative PYL1 Abundance

A scatter plot showing the relationship between Relative PYL1/ABI1 Binding (Y-axis) and Relative PYL1 Abundance (X-axis). The Y-axis ranges from 0 to 100, and the X-axis ranges from 0 to 100. The data points are green dots, and a black curve is fitted to the data, showing a positive correlation. The curve starts at approximately (5, 0) and rises to about (110, 85).

A scatter plot showing the relationship between Relative PYL1/ABI1 Binding (Y-axis) and Relative PYL1 Abundance (X-axis). The X-axis ranges from 0 to 100, and the Y-axis ranges from 0 to 100. The data points are green dots, and a black curve is fitted to the data, showing a positive correlation. The curve starts at approximately (5, 0) and rises steeply, reaching a value of about 85 on the Y-axis at an X-value of 110.

A scatter plot showing the relationship between Relative PYL1/ABI1 Binding (Y-axis) and Relative PYL1 Abundance (X-axis). The Y-axis ranges from 0 to 100, and the X-axis ranges from 0 to 100. The data points are green dots, and a black curve is fitted to the data, showing a positive correlation. The curve starts at approximately (5, 25) and ends at approximately (110, 95).
